This is **Mathew Anthony Tate's** resume. He didn't want it to look like everyone else's so he designed it to fit into this shape. Mathew prefers to stand out from the crowd, and fun, intelligent design is the best way to achieve this. Having a confident, positive attitude and using ingenuity and efficiency to reach his goals makes him successful both in life and any specific tasks he is presented with. He acknowledges that there are always improvements that can be made personally and professionally, which is evident by the constant improvement throughout his history of design work. Thinking toward the future, Mathew has always had too much ambition to remain in school for a single career, however has gained invaluable experience in many facets of the business and its' underlying theory. This knowledge has garnered personal and educational experience

with graphic design and the use of the full Adobe Creative Suite and various other software packages used in 3-D design, animation and illustration. Throughout his work experience, quality, efficiency and being versatile enough to find a solution to any situation has earned him a reputation as a valuable asset. His aptitude for creativity, ability to quickly learn and adapt to new problems, and far-reaching experience across several disciplines has chiseled him into a formidable candidate for such a position as you are offering. This document really isn't about him though; it's about you. I found your listing on Craigslist and know that my skills could be applied toward your **success** and would be excited to show you what I have to offer. I love challenges and solving design related problems, which would simply make me a valuable asset to your company.

Please contact me at  
**mathewtate@gmail.com** or call  
**602.633.5049**  
If you would like to set up an interview or see examples of my work, I am moving to Ohio this weekend and would be available to start immediately. Thank you for your time and I look forward to working with you!

### Freelance Graphic Designer

I've been a graphic designer for 6 years. I was 20 when I fall in love with graphic design and this relationship still continues. My first design was a website for friend of mine, I was very satisfied with it and thought how brilliant and modern it was. When I look at it now, I can't believe that my hands made something like this. I've completely changed my style, now I try to make modern, creative, simple and timeless designs.
